Executive Summary

The success of an institution in achieving its mission and objectives can be measured in a number of ways. An important measurement of outcomes is found through monitoring the success of recent graduates. Through the yearly graduate follow-up survey conducted by the Office of Institutional Research and Planning, the College obtains information regarding employment status, salary levels, and attendance at transfer institutions of its graduates. The Graduate Follow-up Report on the Class of 2004 provides a common core of information about the Onondaga Community College graduates.

This survey was administered to the 2003-2004 graduates during November 2004 and early 2005. Questionnaires were mailed to 894 graduates and a total of 357 (39.9%) responded.

Highlights:

- 42.8% of the degrees awarded were for Career Programs while 57.2% were for Transfer Programs.
- 57.8% of the graduating Class of 2004 was female.
- 77.4% of the responds were whites followed by African Americans (6.5%).
- 90.4% of the respondents indicated that they were either very or generally satisfied with their education at OCC.
- 92.8% of the respondents would attend OCC again if they have a chance to relive their experiences at the college.
- Overall, 98.9% of the respondents would recommend OCC to others.

Employment:

- 48.7% of OCC graduates are employed full-time, and another 20.2% employed part-time.
- Of those employed full-time:
 - o 68.8% of them indicated that their current occupation is either highly or slightly related to their program of study at OCC.
 - o Average income is \$28,768 and the median income is \$25,000.
 - o 94.2% of them stayed within New York State; of these 82.2% remained in Onondaga County.
- 37.6% felt that finishing their degree or certificate program was important to getting their current job, and 32.7% felt that the specific program of study was important to getting their job.

Education:

- 45.1% of the respondents are currently furthering their education, of these:
 - o 82.6% are enrolled full-time students.
 - o 85.0% are working on a baccalaureate program. About 89.7% of these indicated that their current field of study is either highly or slightly related to their degree program at OCC.
 - o 80.4% said they transferred to a 4-year college without any difficulty.
 - o 50.3% are attending New York State 4-year public institutions and 32.9% are attending private institutions in New York State.

Introduction

Each year the Office of Institutional Research and Planning conducts a follow-up survey of graduates in order to identify how experiences at OCC have contributed to their success. This report compares the Class of 2004 with the graduates of the four previous classes of 2003, 2002, 2001 and 2000. These comparisons seek to identify demographic profiles in education and work-related trends.

The findings for the Class of 2004 are based on 357 (39.9%) respondents from the total sample of 894 graduates receiving degrees or certificates, whose graduation dates were August 2003, December 2003 or May 2004. A packet was mailed to all graduates containing a cover letter, survey, and a self-addressed, postage-paid return envelope. Approximately six weeks after the first mailing a second survey was mailed to all non-respondents.

This report is organized into three major sections. Each part provides information summaries with five-year comparison data. The first section displays information trends about degree awards, ethnic background, gender and reasons for earning a college degree. The length of time it takes to earn a degree/certificate and evaluation of college services were gathered for the Class of 2004.

The second section displays employment status for current and previous four-year graduate respondents. A list of employers and occupations of current graduates is provided in the appendix.

The third section provides information about students who transfer to other educational institutions. Transfer institutions, student status and type of institution attended are also listed in the appendix.

In addition, a list of colleges and major fields of study for each curriculum; summary data for Employment and Transfer by Degree and Curriculum for the Class of 2004 and the Graduate Follow-Up Study Survey are in the appendix.

Section I: Student Profile

Graduates by Degree Type

Of the 905 degrees granted to the Class of 2004, 387(42.8%) were in Career programs, while 518 (57.2%) degrees were in Transfer programs. As Table 1.1 shows, 38.5% of the degrees granted were AAS degrees, 29.7% were AA degrees, 27.5% were AS degrees and the rest were Certificates.

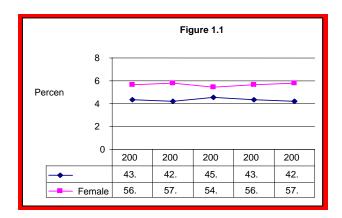

The percentage of students receiving AAS degrees which has increased steadily from 2000-2003 took a 7.6% decline in 2004. On the other hand, the percentage of students receiving degrees in AA and AS continues to rise.

Graduates by Gender

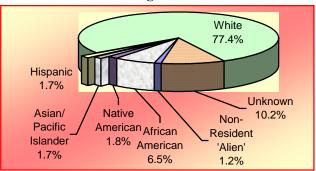

As Figure 1.1 demonstrates, over half (57.8%) of the graduating Class of 2004 is female. This is consistent with previous four years gender make-up of graduates.

Graduates by Ethnic Background

As Figure 1.2 shows, a greater majority (77.4%) of the class of 2004 graduates are White. This is followed by African-American (6.5%), Native American (1.8%), and Hispanic (1.7%).

Figure 1.2

Educational Goals

In order to better understand how our graduates feel about their experiences at OCC, the survey asked them to identify initial and final educational goals, and OCC's effectiveness in helping to accomplish these goals.

As shown in Table 1.2, the initial educational goal for majority (64.4%) of the 2004 graduates was to attain an Associate degree from OCC. This was followed by 10.2% who plan to continue their education up to the bachelor's degree level after graduation from OCC. About 7.0% of the graduates came to OCC for transfer purposes only.

About 31.9% (Table 1.2) of the graduates indicated that their educational goals changed while enrolled at OCC. Of those whose educational goals changed, 34.6% indicated that *Bachelor's degree* was their final educational goal and 30.2% said Associate degree from OCC.

On the question of whether the graduates accomplished the educational goals they set for themselves at OCC, about 81.1% said they accomplished their goals fully. In addition, about 17.5% of them said they accomplished their educational partially.

Length of Time to Earn Degree/Certificate

Table 1.3 shows that most of the responding graduates indicated that the length of attendance at OCC was from 2 to 2½ years. Overall, the percentage of graduates indicating that they earned their degree in less than 3 years was 64.8% for an AA degree, 54.7% for an AAS degree, 61.9% for an AS degree and 90.0% for a Certificate.

Level of Satisfaction

Graduates were asked about their overall satisfaction with the College. Over ninety percent (90.4%) of the respondents indicated they were either 'Very satisfied' or 'Satisfied' with their education at OCC (Table 1.4). When asked if they had the chance to relive their college experience would they choose to attend OCC, 92.8% reported either 'Definitely would' or 'Probably would'. Graduates were asked to indicate if they would recommend OCC to others, 98.9% of the respondents indicated that they 'Definitely would' or 'Probably would'.

Graduates were also asked to report on their level of satisfaction with a number of services at Onondaga Community College using the following scale: Very Satisfied, Satisfied, Neutral, Dissatisfied, Very Dissatisfied and Not Used. Services were grouped into five areas: Academic Environment, Social/Cultural/Recreational, College Climate/Environment, College Services/Facilities and College Value/Outcomes. Items with the highest level of satisfaction were, 'choices of programs of study' (93.8%), 'felt safe on this campus' (88.5%), 'attitude of faculty toward students in class' (87.0%), 'overall quality of instruction' (86.9%), 'felt welcome on this campus' (84.0%), 'contribution of classroom experience' (83.6%), 'cost/value of attending OCC' (80.1%), 'Library facilities' (78.2%), 'Library services' (77.2%) and 'Library hours' (75.7%). Parking was the least satisfactory item identified by OCC graduates (Table 1.5).

Section II: Employment Report

Employment Status

This section provides five-year employment summaries from previous graduate surveys. As Table 2.1 shows, 48.7% of the 2004 graduate respondents were employed full-time, a decrease from 53.0% in the previous year. About 20.2% of graduates were employed part-time, this has been on a steady decline with the 2002 graduating class. Also, 33.5% of the 2004 graduates indicated that they work and study at the same time about 2.0% decrease from the previous year.

For a complete list of employers, job title and mean salaries for each program see Appendix A.

Factors important in securing current job

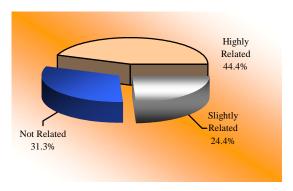

As Table 2.2 demonstrates, 37.6% of those employed stated that *finishing their degree/certificate* was important in obtaining their current job. Specific program of study was also perceived as an important factor in obtaining employment for 32.7% of the graduates. However, the significance of these factors declined about 6% and 12.6% for finishing their degree/certificate and specific program of study respectively from the previous year.

As Figure 2.1 shows, 68.8% of the graduate respondents employed full-time indicated that their current occupation is either highly or slightly related to their program of study at OCC.

Figure 2.1

Full-Time Employees/Salary and Location of Employment

Onondaga Community College continues to make important contributions in preparing and training the workforce of Onondaga County. Over the years, the percentage of graduates who reported working full-time in Onondaga County is over 80%. However as Table 2.3 shows, the percentage of graduates working full-time in Onondaga County decreased from 88.2% in 2003 to 82.2% in 2004.

The average income of graduates employed has been in the high \$20,000 since 2000. About half of graduates employed full-time earned more than \$25,000 in 2004 about \$1,500 lower than those from 2003.

See Appendix A for list of top employers and the most frequently listed occupational areas.

Section III: Transfer Report

Educational Status

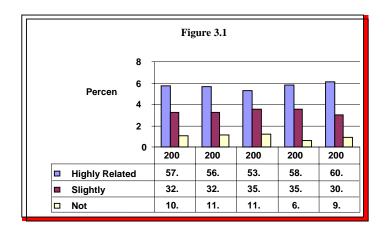

This section provides 2004 and four-year data on transfer information. Nearly half of the graduate respondents (45.1%) indicated that they were attending a college, university, or training program. Of those transferring to another institution, 82.6% (Table 3.1) were full-time students and 17.4% indicated attending part-time. Over eighty percent (85.0%) of the graduates who continued their education indicated that they expected to earn a Bachelor's Degree. The majority (80.4%) reported transferring without difficulty.

More than half of the students (57.6%) were continuing their education in a field of study highly related to their OCC degree program, while another 32.1% indicated their field was only slightly related to their OCC degree (Figure 3.1).

For a complete list of transfer colleges and major field of study for each program see Appendix B.

Institution Location

As shown in Table 3.2, 50.3% of the graduate respondents were attending New York State 4-year public institutions, 32.9% attending 4-year private institution, while 6.6% transferred to institutions outside of New York State. The number of graduates who said they transferred to other two-year institutions is 10.2% in 2004. This represents a doubling of the percentage of students transferring to two-years institutions from previous years.

For a list of top transfer institutions and frequently listed majors see Appendix B
