

19. Round 846.286 to the nearest hundredths. \_\_\_\_\_
20. In the number 426.815, state the digit in the hundredths place. \_\_\_\_\_
21. Which fraction is the smallest?  $\frac{3}{4}$  or  $\frac{5}{8}$ ? \_\_\_\_\_
22. Reduce  $\frac{12}{20}$  to lowest terms. \_\_\_\_\_

Answer Key:

- |  |  |
|--|--|
| 1. $7 = \text{VII}; 10 = \text{x}$         | 2. $\text{XIV} = 14; \text{XVII} = 17$ |
| 3. 10.34                                   | 4. 2.16                                |
| 5. 1.7376                                  | 6. 21                                  |
| 7. 5.32                                    | 8. $\frac{1}{5}$                       |
| 9. $\frac{9}{20}$                          | 10. $\frac{5}{4} = 1\frac{1}{4}$       |
| 11. $\frac{4}{8}$ or $\frac{1}{2}$         | 12. $\frac{63}{8} = 7\frac{7}{8}$      |
| 13. $\frac{32}{100} = \frac{8}{25} = 32\%$ | 14. $.255 = 25.5\%$                    |
| 15. 54                                     | 16. 300                                |
| 17. 25                                     | 18. 24,000                             |
| 19. 846.29                                 | 20. 1                                  |
| 21. $\frac{5}{8}$                          | 22. $\frac{3}{5}$                      |
